## Significant events in the reported period

In the first three months of this year, total sales reached EUR 48.8 million, marking a 7% increase from the previous year of EUR 45.5 million. Higher sales prices offset the decrease in volume, as the Company is pursuing its repositioning strategy in the private labels market segment.

During the reporting period, the normalized total operating result EBITDA (EARNINGS BEFORE INTEREST TAX DEPRECIATION AND AMORTIZATION), that is used by the Company for the assessment of the operational and financial efficiency, was positive and reached EUR 0.15 million, reflecting the decrease of EUR -1,05 million compared to the previous year. In the first quarter of 2025 the Company started to implement its repositioning strategy in the private labels market segment: the gradual increase of prices to improve its profit margins.

Gross Margin for the quarter increased from EUR 14.5 million to EUR 16.2 million (+12% YoY). Operational costs rose from EUR 15.2 million to EUR 18.1 million (+19% YoY), thus reflecting only partially the adjustment of fixed costs to the new production structure and product-mix. Consequently, Operating Profit EBIT decreased of EUR -0.9 million, from EUR -0.7 million to EUR -1.6 million YoY.

Net result after taxes (loss) improved of EUR +2.2 million from EUR -3.4 million for 1Q24 to EUR -1.2 million for 1Q25, mainly due to substantial net financial profit of EUR 0.5 million, compared to net financial loss of EUR -3.2 million in 1Q24. The repayment of the debt to Kartesia with the proceeds from the bond issue, significantly lowered the cost of financing and simultaneously the Company realized gains on financial instruments that are used for hedging.

Total assets on 31 March 2025 of EUR 146.3 million were EUR 52.4 million lower than at 31 December 2024, which means the decrease of 26% for the quarter. The net assets at the end of March were EUR 45.9 million, and were EUR 16.6 million higher, compared to EUR 29.2 million at 31 December 2024. This is the result of the repayment of the debt to Kartesia and the change of the debt structure if the Company, i.e. the replacement of the loans to Kartesia with the debt towards the bondholders.

The equity ratio was 31% at 31 March 2025, compared to 15% at 31 December 2024.

## Significant risks monitored by the Management

Since the end of 2024, the Company has been closely monitoring changes in the US customs policy. The proposed measures include increased tariffs on all imported goods and additional duties targeted at specific countries and sectors. Additional duties of 20% were imposed on goods imported from the EU countries, including the Company's products, afterwards reduced to 10%. The Company has not interrupted deliveries to customers in the USA.

The subsidiaries Okechamp S.A. and Okechamp B.V. are still the participants to the anti-dumping customs proceedings conducted against them by the U.S. Department of Commerce (US DOC). The subsidiaries were requested to submit supplementary data to the US DOC for the review period from 01.11.2022 to 30.04.2024. According to the information we received from the law firm Faegre Drinker, representing the Company in these proceedings, preliminary decisions of the US DOC are expected in November/December 2025.

The Group, continues to operate in a difficult macroeconomic environment characterized by persistent inflationary pressure. The largest cost increases were observed regarding cost of labor, particularly in Poland, where rising wages and increasing competition for skilled workers put pressure on personnel costs. In order to partially offset this cost inflation, the Company is implementing a plan of targeted increases of product prices. These actions are being implemented gradually, in close coordination with our key customers. We take into account the structure of contracts, market dynamics and long-term relationships of the Group. Our actions are aimed at preserving margins and ensuring operational stability.

The Company is subject to high volatility on currency markets. A significant part of revenues is generated in USD and PLN, while a large part of the cost base is denominated in EUR and PLN. In order to manage currency exposure, the Group actively hedges its EUR/PLN and USD/PLN positions using financial instruments.
